

## HOW TO DRAW A DOG SCRIPT:

Hello, my name is Nix and welcome to how to draw.

The show where we learn how to draw.

Today we will be drawing a dog.

This is how we draw a dog.

- Step one is to draw the dog's head, which has no thoughts.
- Step two is to draw the ears, which are good for an itchin' and a scritch in'.
- Step three is to draw the nose for lots of sniffs and eyes that stare into your soul.
- Step four is to draw the tongue as the mouth, for lots of kisses.
- Step five is to draw the belly, which is important for plenty of treats and belly rubs.
- Step six is to draw the legs and paws, which are essential for zoomies.
- Step seven is to draw the tail, which is needed for lots of wagging.
- Step eight is to clean up the lines.
- Step nine is to color in the dog.

Then you will have a wonderful picture of a dog.

Show your dog their likeness.

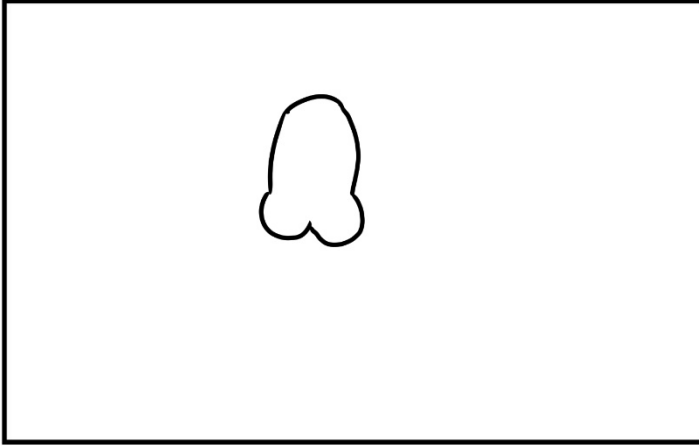

Or draw the dog of your dreams.

Thank you for watching.

I hope to see you next time we learn how to draw.

Dogs.
